

Limited Warranty and Service for Replacement Parts of KACO new energy inverters

These warranty terms apply to components purchased and replaced on KACO new energy ("KACO") inverters for which limited warranty and service policy is expired and the replacement parts service contract has not been signed (at the time of the replacement).

This warranty includes the smooth operation of the products. Any other rights or claims (as defined in KACO Limited Warranty and Service policy terms and conditions) are excluded.

The manufacturer's warranty shall not affect the buyer's legal rights on warranty claims.

Replacement Parts Warranty and Service Conditions:

- KACO warrants that any repaired or replaced component of KACO inverters will be free from defects in material and workmanship for 90 days from the date such service was rendered.
- The warranty period of a replaced or repaired component continues for the remaining portion of the original KACO Limited warranty of the inverter or 90 days from the date replacement or repair component was provided to the customer, whichever is greater.
- This document is an integral part of "KACO Limited Warranty and Service Policy", valid at the time of sale of the inverter, and therefore the instructions contained in it remain valid (without limitation) in particular: assistance and service requests, considerations about the assistance, exclusions of the limited warranty rights, services after the expiration of the limited warranty period, and liability of the costs of the service assistance.
- Fuses and other wearing parts are excluded from this warranty.
- All labor, travel, expenses and shipping are excluded from this warranty and an estimate must be paid prior to dispatching a technician.

*KACO expressly points out that warranty services will be provided on the condition that the purchase price thereof has been fully paid to KACO new energy.
